M4U Music For You
HIGH PERFORMANCE HEADPHONES
FORTY YEARS OF AWARD-WINNING ACOUSTIC DESIGN

PSB gets up close and personal with your hi-fi. We’ve taken our 40 years of bringing real sound to real people and packed it into our exciting new Music for You (M4U) series of high performance headphones.

You’re listening to music more than ever before, but now you can do it in comfort and style with PSB’s true-to-nature sound quality. Our new headphones bring you so close to the music. It’s like the music is meant just for you.

Designed for people on the move.

On a train, on a plane, from your computer to your bedroom, PSB headphones are lightweight and ready to pack up anywhere you want to go. Fold ’em up into the protective travel case and you’ll never be far from true hi-fi listening. We even added a thoughtful touch for your comfort—dual input connections on either side of the headphones means no more crossed wires. Just plug in the cable on the left or right and be within easy reach of a headphone jack no matter where it’s situated.

Ergonomically sound.

Listen longer in extra comfort. Our unique two-way adjustable ear pads are gyro-suspended for optimal ergonomics and supreme comfort. Super soft ear pads and light weight make the headphones “disappear”, leaving only rich, detailed sounds. The expandable headband also adjusts easily for a more customized fit.

M4U 1 Over-Ear Headphones

All of the music. None of the noise.

Sometimes you just want it to be just you and your music in your own personal space. Our M4U 2 Active Noise Cancelling Headphones don’t let anything come between you and enjoying your music. Thanks to PSB’s exclusive Room Feel™ technology, your music will sound so rich and natural you’ll think you’re listening to a set of high-end loudspeakers.

All of the music. Non-stop.

The M4U 2 model features three convenient modes of operation: Active Noise Cancellation (ANC), Active Mode, and Passive Mode (without batteries). Listen all day and all night with 60 hours of run time in ANC or Active modes. When you’re out of batteries, switch to Passive Mode without missing a beat.

M4U 2 Active Noise Cancelling Headphones

Just music.

For at-home or on-the-go listening, these passive mode headphones are designed to give you the experience of Room Feel, but without all the fuss. Just put them on and enjoy. No batteries or switches necessary. Just pure simple sound. Like all PSB designs, the M4U 1 model emphasizes true-to-nature sound that doesn’t take anything away from the musical performance.

Just comfort.

The ergo-fit ear pads are self-adjusting to give you a precise fit, and naturally isolate your music from the outside world. The light weight and extremely soft replaceable ear pads allow you to lose yourself in those extended listening sessions.

The M4U 1 high performance system includes a protective travel case, two tangle-free cords (one with remote and mic functions), a cleaning cloth, and 1/4” (6mm) stereo and dual input flight adaptors. Available in Baltic Grey, Monza Red and Black Diamond.*

*Some finishes may not be available in some countries.
